

the future of stone.

Real stone,
thin & flexible

SLATE LITE

THE INNOVATION:

REAL STONE, THIN & FLEXIBLE

Slate-Lite is an innovative **real stone veneer** that consists of an ultra-thin layer of natural stone and a backing reinforced with glass fibers or cotton.

We have developed a specialized process to extract many ultra-thin slabs from the most beautiful stone blocks in the world. Each of these slabs is a **unique piece**, **handcrafted** through over **12 processing steps**.

Despite its lightweight nature, Slate-Lite **retains the texture and appearance of a solid stone slab**. Our stone veneer is only **approximately 1.5 mm / 0.06 inch thin** and even flexible.

DIN EN 15102:2011-12
DIN EN 15102:2008+A1:2011

APPLICATION: EASIER THAN YOU THINK!

Thanks to the low overall thickness of the material, *Slate-Lite* can be installed in just a few simple steps. Whether it's cutting, adhesive application, or protecting against extreme stress - our stone veneers can be assembled by non-professionals as well!

1 CUTTING

Cut the stone veneer to the appropriate size if necessary. This can be done using a hand saw, table saw, multitool, or laser.

2 PROTECTION

Depending on the application location, apply impregnation or sealing with a short-nap roller.

3 ADHESIVE

Apply an appropriate adhesive evenly on the mounting surface or the back of the material.

4 INSTALLATION

Position the stone veneers at the desired location and press them in place.
DONE, THAT'S IT!

Do you have more questions about the processing and possibilities of Slate-Lite? No problem: On the application page in our online store and the accompanying FAQ, we provide detailed answers to the most common inquiries.

In our **overview video**, we'll walk you through how to process Slate-Lite efficiently and the common standard tools you'll need for it.

We'll also demonstrate the revolutionary method we use to achieve the remarkable thinness of our stone veneers, all while maintaining their 100% natural stone surface!

www.slate-lite.us/thevideo

STONE TYPES, & SIZES

CHARACTERISTICS

Slate-Lite is handcrafted from natural layered stone.

► **Each stone sheet is a unique masterpiece!** ◀

Color variations in individual sheets, quartz veins running through the stone, or natural cracks and structural changes are qualities of the 100% natural stone surface.

Nevertheless, our **5 types of stone** have some basic characteristics and features that are core attributes of each stone type:

SLATE

Our multicolor slates typically have a slightly softer stone surface and impress with their rich colors as well as constantly changing patterns and textures.

MICA

Mica typically has a slightly rougher surface with homogeneous patterns. A special eye-catcher is the shine effect created by the natural quartzite content in the stone.

LIMESTONES

Our limestones impress with a smoother surface and relatively homogeneous patterns and textures. Limestones are not suitable for outdoor or wet areas!

SANDSTONES

Sandstones stand out with a slightly rough, somewhat grainy surface featuring subtle height variations and partial, smaller protrusions with greater overall thickness..

MARBLE

The split-rough surface with strong veining and protrusions on the surface is the core characteristic of marble. Constantly changing patterns and partial structures with greater overall thickness create an exciting overall appearance.

FOTOMATCHING

With our optionally bookable **FOTOMATCHING service**, you will receive a lot image of the available stone block before delivery.

This way, you can decide in advance whether you like the pattern variation or if you would prefer to receive a different batch!

ORDER DIRECTLY IN YOUR CUSTOM SIZE

Custom size

—

Upon request, you can also order our stone veneers directly in **your individual custom size**.

Depending on availability and scope, your stone sheet will then be produced to the exact millimeter in our factory for you or cut to size in **our in-house Workbox department**.

Thanks to our **laser service**, **custom shape cutouts**, such as company logos or other custom designs, are easily achievable!

Simply get in touch with us and request your non-binding quote.

SLATE-LITE

The all-rounder

DATA SHEET

Suitable for indoor & outdoor use ✓

Variable sizes up to 2.800 x 1.200 mm /
110 1/4 x 47 1/4 inches ✓

More durable than raw stone slabs ✓

Slate-Lite is a thin stone veneer with a fiberglass backing and a 100% natural stone surface. Despite its lightweight construction and a total thickness of only approximately 1.5 mm / 1/16 inches, it is extremely robust and durable.

Slate-Lite can be used both indoors and outdoors for wall cladding or as a backsplash in the kitchen. Even extraordinary living spaces made of stone in wet areas like bathrooms or showers are possible with *Slate-Lite*!

UltraThin eco+ is an extremely thin and flexible real stone decor with a cotton mat as its base.

Thanks to its lightweight and minimal use of natural stone resources, it offers an environmentally friendly solution with CO₂-efficient transportation.

The natural mat on the back enables easy processing and opens up many new possibilities for interior applications and furniture construction.

With UltraThin eco+, you can even master complex custom shapes and challenging edge areas!

TRANS|LUCENT

Eye-catching with luminosity

DATA SHEET

Different effects depending on the light source. ✓

Variable sizes up to 2.800 x 1.200 mm / 110 1/4 x 47 1/4 inches ✓

Suitable for any light source ✓

With our Translucent decors, you become a lighting designer thanks to the **transparent backing material** on the backing!

The light-transmitting backside creates **unique lighting effects** when there is a light source behind the stone sheet, allowing you to create **extraordinary backlit objects**!

Depending on the type of light used, different effects can be achieved: you can use both cold and warm, or even colored light to create your **individual stone light object**.
